

Benefect 20376 Botanical Disinfectant Wipes, EPA-approved *6"x7", 250 per pail*

The latest product evolution from the creators of Benefect is Botanical Disinfectant Wipes! Specifically designed for the needs of the restoration contractor and to complement our Botanical Disinfectants & Cleaners. EPA registered to kill over 99.99%* of common disease-causing organisms such as Staph, Salmonella, Pseudomonas, E-coli, Influenza (flu virus), MRSA, Enterobacter and Rhinovirus. The convenient single-use wipe will prevent cross-contamination on any surface where germ control could be an issue.

Combining the same proprietary thyme oil Active Ingredient that Benefect is known for, with a new, extremely durable, wood pulp wipe, we have created a Restoration Grade product that is strong enough to tackle rough surfaces like wood and concrete with no shredding, pilling or lint left behind. Adding the Benefect Decon 30 platform to a dense woven wipe also gives it a distinct foaming advantage that ensures longer contact time to kill germs and improved visibility of surface coverage over conventional wipes. Surfaces are left clean and decontaminated with no streaky residue. Just wipe and walk away!

Ideal for decontamination, preventing cross-contamination, cleaning, disinfecting and deodorizing surfaces such as equipment, PPE, or building contents. Also ideal for controlling the spread of germs by disinfecting high-touch areas in residential or commercial cleaning.

- Strong, Durable Biodegradable Wipes!
- Decontaminate & Disinfect in One Easy Step
- Fast 30 Second Kill!
- Kills over 99.99%*
